**Abstract**—This document provides a solution for the problem of finding slopes of two lines, slope of one line being double of the slope of another line. and tangent of the angle between them is  $1/3$ .

## I. PROBLEM STATEMENT

The slope of a line is double of the slope of another line. If the tangent of the angle between them is  $1/3$ , find the slopes of the lines.

## II. THEORY

Consider the lines as two directional vectors  $v_1$  and  $v_2$ . Angle between the two vectors can be obtained by dot product of the two vectors.

Fig. 1. Angle between two vectors

$$\theta = v_1 \cdot v_2$$

The dot product of the vectors is given by

$$v_1 \cdot v_2 = |v_1| |v_2| \cos \theta$$

## III. SOLUTION

Here these two vectors are considered to be passing through origin. The equations for these two vectors are:-

$$y = m_1 x$$

$$y = m_2 x$$

Where  $m_1$  and  $m_2$  are slopes of the vectors  $v_1$  and  $v_2$  respectively. Let  $m_1 = m$ . Given  $m_2 = 2m$

These vectors can be represented as below:-

$$v_1 = \begin{pmatrix} 1 \\ m \end{pmatrix} v_2 = \begin{pmatrix} 1 \\ 2m \end{pmatrix}$$

The dot product of the vectors is given by:-

$$v_1 \cdot v_2 = |v_1| |v_2| \cos \theta$$

Given that  $\tan \theta$  is  $\frac{1}{3}$ . By Pythagorus theorem, we can obtain  $\cos \theta$  as  $\frac{3}{\sqrt{10}}$ . Therefore,

$$\begin{aligned} \cos \theta &= \frac{v_1 \cdot v_2}{|v_1| |v_2|} \\ \frac{3}{\sqrt{10}} &= \frac{1 \times 1 + m \times 2m}{\sqrt{1+m^2} \sqrt{1+4m^2}} \end{aligned}$$

Applying square on both sides:-

$$\begin{aligned} 9 \times (1+m^2)(1+4m^2) &= 10(1+2m^2)^2 \\ 4m^4 - 5m^2 + 1 &= 0 \end{aligned}$$

$$m_1 = m = 1, -1, \frac{1}{2}, -\frac{1}{2}$$

Substituting the value of  $m_1$  we get value of  $m_2 = 2, -2, 1, -1$ .

## IV. CONCLUSION

The slopes  $m_1$  and  $m_2$  of vectors  $v_1$  and  $v_2$  for the said conditions are: -

$$\begin{pmatrix} 1 \\ 2 \end{pmatrix}, \begin{pmatrix} -1 \\ -2 \end{pmatrix}, \begin{pmatrix} \frac{1}{2} \\ 1 \end{pmatrix}, \begin{pmatrix} -\frac{1}{2} \\ -1 \end{pmatrix}$$
